

Do you want to learn how to convert image data into 3D-printed models?

Attend a [hands-on training](#) and discover how the Mimics® Innovation Suite can help you **take patient-specific healthcare and cardiovascular R&D to new levels!**

Join us on **December 16** in Caesarea and learn how you can:

- **Segment semi-automatically** the different structures of the heart in just a few minutes
- Simplify your cardiovascular **design process**
- Utilize the 3D view and **fluoroscopy angles** to simulate your procedure
- Prepare your mesh for **CFD simulations**
